

Brett C. Don

Chief Information Officer

bdon@stradley.com

Washington, DC: 202.292.4524

Brett Don is the chief information officer for Stradley Ronon. Brett ensures the efficient delivery of technology services to the firm's more than 200 lawyers across nine offices.

A results-driven technology and risk executive, Brett leverages his two decades of experience with advanced technologies to improve customer productivity, reduce risk and innovate for top-line growth. He is a trusted resource to the firm's board of directors, fostering productivity and performance using the latest technologies to maximize revenue while minimizing service disruptions.

Brett, a Certified Information Security Manager (CISM), uses these skills to build the firm's information security program to align with client expectations and help the firm achieve ISO 27001 certification, which the firm received in 2022.

Prior to joining the firm, Brett founded SDK Risk + IT Advisors LLC, an organization that advised executives on complex business problems related to technology and information security. He also served as chief information and risk officer at a Washington, D.C.-based law firm where he set the strategic direction for IT, security, e-discovery, records, new business intake, docketing and knowledge management services.
